Zebra V2.3 ReadMe

Thanks for demoing/upgrading to Zebra V2.3 – it's a great software synthesizer. But before you start, please read these lines to ensure the best user experience!

Before you install

If you already have an older version of Zebra 2.x installed it is recommended to backup your patches so nothing gets lost by accident.

Updating on Windows: If you chose „Everything in Vstplugins" in previous installers, you may rather download & install the „pre-installed" version of Zebra2. There's an easy way to find out: If you have a directory called „Zebra2.data" in Vstplugins then you need the pre-installed version. Otherwise you should use the installer.

Updating on MacOS X: If you have older versions of Zebra installed in your home Library location, you should move these to the trash before you install. That especially accounts for VST versions in MacHD/Users/You/Library/Audio/Plug-Ins/VST/

Installation

On MacOS X or using the Windows installer, just doubleclick the installer and follow the instructions.

If you have the pre-installed version for Windows, just copy the .dll files and the „Zebra2.data" directory to Vstplugins. Be cautious though – **if you overwrite an older „Zebra2.data" directory, files may get lost**. In that case you may want to backup „Presets" and „Support" (for your preferences and registration info).

What's new in V2.3?

– RTAS support on MacOS X
– switchable & scalable user interface themes
– additions to oscillators („Eleven", more Osc FX)
– LFO speeds can now be set independent from host tempo
– MIDI Program Changes
– several bugfixes, including MidiLearn woes
– new Sideband Filter (frequency shifter) modules
– new ModMapper modules
– FX Bypass
– Voice Drift can now be switched off for strict tuning
– improved host compatibility/workarounds incl. „Logic reset" and „Live no-reset"

User Manual

An evergrowing manual is available online here:

http://www.zebrasynth.com/manual/

It is based on blogging software because Zebra is an evolving software with a complexity that requires additions and clarification in the manual every now and then. Offline manuals in .pdf format are available in English, French, German, Italian and Spanish on the same site.

System Requirements

System Requirements apply as stated here:

http://www.zebrasynth.com/index.php?item=technical

Now have fun!
